# S **A** fer.

## Hospital safety matters now more than ever.

That's why at Mount St. Mary's Hospital, we're proud to have earned **four "A" grades in a row from the national Leapfrog Group.**

It's proof of our unwavering commitment to patients throughout our hospital, including the ER, Center for Women, and Surgical Services, as well as departments including maternity, neurology, orthopedics and imaging. As a designated Primary Stroke Center, Mount St. Mary's also provides advanced, effective care for acute stroke patients.

Thank you to all our healthcare heroes for delivering the safest, highest quality care to every patient, every day.
