Drug-free Help for Migraine Sufferers

An estimated 30 million Americans suffer from the debilitating condition known as migraine headaches. While migraines have been documented in the medical literature for 5,000 years, their actual cause remains a mystery.

According to research conducted at Northwestern Chiropractic College in Minneapolis, **migraines resulting from neck injury may respond to chiropractic treatment.** In fact, those migraine patients in the study treated with spinal manipulation reported the same degree of relief from their symptoms as those treated with muscle relaxants. However, over time, those who received chiropractic treatment had fewer and less severe headaches.

Many headache sufferers are turning for relief to the safe, natural, drugless, chiropractic approach to health. Chiropractors have, for over a century, observed that after chiropractic spinal care, children and adult migraine sufferers report improvement or alleviation of their condition. Chiropractors don't heal headaches; they use special techniques to perform spinal adjustments to remove nerve pressure and spinal distortions. These spinal distortions can in turn place abnormal stresses on the connecting membranes (meninges) of the bones of the head which create tension and headaches.

In addition to structural causes, there can be dietary and environmental causes for Migraines. At Rose Chiropractic, P.C., 435 Ridge St., Lewiston, we use safe, natural, non-invasive methods to determine these additional factors. *Find out how we can help you! Call (716)754-9039.*
